EDUCATION

Caraga State University - Cabadbaran City
Bachelor of Science in Information Technology
June 2019 - July 2022

PROJECTS

Web-Based Employees Leave Information System

A web-based application capstone project designed to reduce paperwork and allow all employees to track the status of their leave requests, automatically calculate the leave credits of employees, and approve the employees' leave requests by Higher Authorities through online.

Enrollment Information System with Decision Support and Security

Developed an Enrollment Information System using PHP and Bootstrap. A web-based application designed to manage and streamline the administrative tasks related to student enrollment in educational institutions.
